

**Model 7032 Outboard Motor
Front Mount Steering Cylinder**

Kobelt Manufacturing with its vast variety of bronze and stainless steel marine control and steering gear components, has been asked on many occasions to manufacture steering gear for outboard motors. These requests came simply because most of the outboard steering devices in the market are made either in aluminum, zinc or plastic and do not seem to stand up to the marine environment too well.

Kobelt Manufacturing took a whole new look at outboard steering devices and developed the new 7032 cylinder which is shorter in length, easier to install and service in the field, and also provides for twin outboard motor configuration with a connection point for a tie bar. This unit will provide years of trouble-free service.

Specifications

Maximum Pressure:	1000 p.s.i. (69bar)
Cylinder I.D.:	1 1/4" (31.8 mm)
Cylinder Stroke:	7 1/2" (190 mm)
Effective Piston Area:	0.921 in. ² (4.9 cm ²)
Displacement:	6.9 in. ³ (113 cm ³)
Pipe Port Size:	1/4" NPT
Weight:	11 lb. (5 kg)"
